

VIRIDIAN GREEN LASERS ANNOUNCES THE INTRODUCTION OF

THE VIRIDIAN X5L GREEN LASER SIGHT WITH LED TACTICAL LIGHT

SEE BETTER. SHOOT BETTER.

MINNEAPOLIS, MN – 1/31/08 Viridian Green Laser Sights, a subsidiary of Laser Aiming Systems Corporation, announces the introduction of the Viridian X5L green laser sight with LED Tactical Light unit. This revolutionary new product provides an extremely bright green laser coupled with an exceptionally brilliant and efficient LED (Light Emitting Diode) in a remarkably compact design. The Viridian X5L green laser sight is built to fit Universal, Weaver, or Picatinny railed guns. The X5L features patent pending SMARTLASER technology to allow complete mode control of both the green laser and the LED tactical light.

The benefit of a green laser is that it is many times more visible than red, allowing for it to be used anytime, day or night, indoors or outdoors, permitting you to track your target quicker and more accurately. Because green lasers are so much more visible to the human eye, an actual visible green beam can be seen in low-light or nighttime conditions.

The benefit of the LED used in the X5L is that it is rated for 100,000 hours, is exceptionally small, has an incredibly impressive brightness to power consumption ratio and is virtually indestructible.

The retail price of the Viridian X5L is \$379. The Viridian X5L will be available at dealers nationwide. For more information visit www.ViridianGreenLaser.com or call 1-800-990-9390.

ABOUT LASER AIMING SYSTEMS CORPORATION

Privately held Laser Aiming Systems Corporation is one of the nation's fastest growing laser sight manufacturers. Headquartered in Minneapolis, Minnesota, Laser Aiming Systems is devoted to utilizing cutting edge laser technology to offer compact, powerful, green lasers, for military, law enforcement, and civilian usage. The company prides itself on offering a unique and innovative green laser sight product line that is designed to precisely fit specific guns. By doing so, Laser Aiming Systems changes the traditional gun/laser combination from being one of a bulky add-on situation to one of a compact cohesive gun/laser system that looks and feels as one unit.

VIRIDIAN X5L GREEN LASER SIGHT SPECIFICATIONS

| | |
|---|--|
| Construction | Waterproof, made from high strength Zytel polymer & aircraft aluminum |
| Dimensions | 2.467" L X 1.998" H X 1.185" W |
| Weight | 3.4oz. (including battery) |
| Power Source/Battery Life | One CR2 3V lithium, approx. 1 hour with light & laser, 4+ hours laser only |
| Beam Intensity/Wavelength | 5mW peak, 532nm, Class IIIa, Continuous Wave |
| Beam Divergence/Spot Size | 1.2 mrad, approx. 0.5" diameter at 50 feet |
| Laser Range | Up to 200 yards daylight, 2 miles at night |
| Adjustment | Full windage and elevation on laser |
| Activation/Modes | Ambidextrous w/ SMARTLASER Technology both light & laser (24 Operational Modes) |
| Tactical Light Output/Divergence | 100 lumen continuous, 140 lumen in strobe mode / larger hotspot, optimized for CQB |

"We are absolutely thrilled to offer this revolutionary new product to gun owners and law enforcement agencies across the country" said President and CEO of Viridian Green Laser Sights, Brian Hedeon.

"The X5L is the most compact green laser sight with LED ever developed. This product has the best of everything in a tactical rail system..."

A daytime visible green laser sight to allow additional accuracy and speed in all lighting conditions combined with the most cutting edge LED obtainable.

The X5L is a dramatically superior self defense tool for those who desire the ultimate gun accessory."
